

"The students were **thoroughly captivated** and the teachers were impressed with the **educational value** combined with the entertainment. I will definitely plan to have Jeffrey return to our school!"

*Mrs. Woodmansee, Principal
Sunshine Gardens Elementary, South San Francisco*

Your Students Have Questions! This Show has Answers: It's All SCIENCE!

Free Class Projects, Lesson Ideas
and "Learn How To Juggle" at:
www.ScienceofJuggling.com

How Do You Do That?

When students are curious, teaching is easy! That's why juggling offers a great opportunity to discover **Newton's First Law of Motion**, the effects of Gravity, Friction, Gyroscopic motion, the Center of Gravity, and more! Top quality juggling keeps your students **Focused and Entertained** as Jeffrey breaks down the science in ways they will understand and remember.

How Can I Learn That?

The key to being a world class juggler is the same as being a better student: Understanding **How to Learn!** Students participate as Jeffrey illustrates how the **Biology of the Brain** works to gain knowledge and new skills. Then your students learn how practice techniques jugglers use can help them to study more efficiently, to excel in sports, and to **Learn Virtually Anything!**

The Learning Continues After the Show!

The **15 Page Study Guide** helps your teachers discuss the science learned during the show in more detail. It's filled with fun activities and extra credit questions based on the California State Framework sciences plus mathematics and **Learning Exercises for All Ages.**

Learning to Juggle Grows Brain Cells!

Juggling Workshops can enhance your physical education curriculum and even lead to improved academic performance! As students learn basic juggling skills, Jeffrey goes into more detail about how to **Train Your Brain.**

Fun Entertainment for Your School's
Celebrations and Fundraisers Too!

Booking **Science of Juggling**
